

ENVIRONMENT POLICY

EMEXFRUITS S.A.

At **EMEXFRUITS S.A.**, we are committed to integrating sustainability and environmental care into every aspect of our operations. Our environmental policy is based on the following pillars:

- 1. Sustainability in Production:** We choose to use RSPO-certified palm oil, ensuring not only the quality of our products but also supporting responsible agricultural practices that promote the well-being of the environment.
- 2. Waste Management:** We implement an efficient waste treatment system through an oxidation pond, where we collect and treat effluents, including degreasers, thereby preventing contamination of water and soil.
- 3. Renewable Energy:** Our plant is equipped with solar panels, allowing us to reduce electricity consumption and minimize our carbon footprint.

Our plant is equipped with solar panels, allowing us to reduce electricity consumption and minimize our carbon footprint.
